Business is on The Up Grade Now in Canada

30 Days Bulletin Issued by The Royal Bank

"Business activity in Canada during the second and third quarters of 1934 has maintained a level well above that achieved in 1933," says a bulletin issued by the Royal Bank of Canada. "In spite of the drought which has wrought widespread havoc in the west, and in spite of continued inactivity in the durable goods industries that are responsible for the unemployment in the cities, there is strength and stability in the trend towards recovery. Higher prices for wheat, heavy production of newsprint, exports of lumber to Great Britain greatly in excess of the exports of last year, electrical energy generally in record volume and a steady improvement in the financial situation as indicated by the continued advance in the prices of bonds, constitute important features in the Canadian business scene. Against the background it would be difficult to avoid the conclusion that an autumn expansion of more than seasonal proportions may be anticipated unless there is an adverse turn in foreign affairs which would depress business in all parts of the world.

The present upward trend in prices, however, makes it seem probable that the program will not long be kept within its present narrow limits. Within the past year, wholesale prices have advanced nearly 10 per cent. Only small further increases seem necessary as the prerequisites of a more normal life for business activity.

At the sixth biennial general council of the United Church of Canada, Rev. R. Roberts, D. D., c. Sherbourne St. church, Toronto, was elected moderator. The report of the retiring president showed that 228,821 persons had been received into membership by profession of faith during the past 8 1/2 years.

JUST FOR FUN

A scientist declares that the atmosphere is full of minute earth particles that have drifted from our world into space. You know what some guffers are.

"Just why do you want a married man to work for you rather than a bachelor?" asked "the curious chap."

"Well, replied the boss, "the married man don't get so upset if I yell at them."

An old lady bought a house on the American-Canadian border line. Before signing the contract she asked: "Does the house stand on the American or the Canadian side?"

"On the American," she said. "That's good. I will sign the contract. I have heard that the winters in Canada are very severe."

Annual Meeting of Little Theatre Asso.

Will be Held in Theatre on Friday Evening

On Friday evening of this week the annual meeting of the local Little Theatre Association will be held in the Little Theatre building. The meeting is called for 8 o'clock.

All old members as well as all interested in this movement are urgently requested to be present.

We are assured by officials that the association is in excellent shape for commencing the new season. The only thing necessary to assure a most successful fall and winter is the wholehearted cooperation of the citizens. For this reason it is hoped there will be a good attendance on Friday evening. An invitation is extended to all to attend.

At this meeting election of officers for the coming season will take place and plans made for fall and winter programs.

The world baseball series opens on Sept. 3rd.

Maestro O. Wooding and R. Simpson were week end visitors to Calgary.

A few weeks ago, a young man was drowned while at his work in one of the National Defence camps near Redstone. His companions gave him a very appropriate funeral in the city.

Among those who helped in the funeral were Mrs. Westrom, daughter of Mr. and Mrs. McDermott of this town.

Churches

GORDON MEMORIAL UNITED CHURCH

Pastor: Rev. H. Erskine Bow
Sunday, Sept. 23rd 1934.
10 a.m. Church School.
11:15 Morning Service.
Anniversary Service.
8 p.m. Service at Bowell.
7:30 p.m. Evening worship.
Anniversary service.
Rev. Rowan D. Binning, B. A. of Memorial Church, Medicine Hat, will be the preacher both morning and evening.

"They joy before Thine account to the joy in harvest."

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a.m.

ST. AMBROSE CHURCH

Rev. H. S. Hammett, Vicar.
Sunday after Trinity, 23rd Sept.
8:00 a.m. Holy Communion
10 a.m. Sunday School (and Junior Confirmation class.)
10 a.m. Nora Nova Evensong.
7:30 p.m. Evensong.
Thursday, Sept. 27th, 8 p.m. first Evensong Harvest Home.
Preacher: Rev. H. C. B. Gibson of Vernon, B. C.
For special Harvest Thanksgiving services see next week's Review.

Regulations to Govern Shares in Bank of Canada

Shares of the Bank of Canada to the amount of \$5,000,000 are offered for public subscription by Hon. Edgar N. Rhodes, Minister of Finance. The shares are of \$50.00 each and are offered at par. Not more than 50 shares may be held by any one person and only persons who are British subjects ordinarily resident in Canada or Canadian corporations controlled in Canada, may own stock. These provisions will ensure a widespread interest in all parts of Canada in the sale of stock of an institution to which parliament has entrusted wide powers and responsibilities affecting the financial and economic welfare of Canada.

The bank is authorized to pay cumulative dividends from its profits, after provision for reserves, depreciation, etc., at the rate of 4 1/2 per cent per annum, payable half yearly, which is considered to be an attractive return in comparison with ruling interest rates on high grade securities. Surplus profits are to be applied to the rest of the bank or paid into the Consolidated Reserve Fund provided by the Bank of Canada Act.

The subscription list will open on September 17th and close on or before Sept. 31. The shares are being offered simultaneously in every part of Canada on the 17th instant and whether or not the list is closed before Sept. 21st consideration will be given to all applications received not later than midnight of the day on which the list is closed.

Subscriptions are to be mailed directly to the Minister of Finance, Ottawa, and must be accompanied by an initial payment of \$12.50 for each share and by a statutory declaration which forms part of the application form, evidencing the eligibility of the applicant to become a shareholder. The balance of the subscription price, \$37.50 a share, will be payable on January 2nd, 1935, on or about which date the Bank is expected to commence operations.

The official prospectus and application forms are obtainable from post offices, banks and other financial institutions. One of the important functions to be performed by shareholders is the election of seven directors who, with the Governor and Deputy Governor of the bank, form the Board of Directors who will supervise and control the conduct of the business of the Bank. The seven directors are to be elected from diversified occupations, as follows:

Two whose chief occupation is in primary industry; two whose chief occupation is in commerce or manufacturing; three, whose chief occupation is other than in primary industry or commerce or manufacturing. By the by-laws of the Bank which have recently been promulgated by the Governor in Council, provision is made for a nomination of directors by a requisition of shareholders and for notice of a requisition of shareholders.

Bingville Granary Destroyed By Fire

Building and 1200 Bushels of Wheat Total Loss

Twelve hundred bushels of wheat were destroyed by fire last Saturday on the farm of Carl Larson, of the Bingville district. The wheat was in a granary about 50 feet away from the barn but as the wind was a favorable the barn was saved. The building and grain were a total loss as there was no insurance on either. The fire is supposed to have started from spontaneous combustion as the grain was wet and there was no fire of any kind near the building.

Mr. and Mrs. Larsen were in Medicine Hat at the time. Only their son and daughter, aged 14 and 16 were at home. To them is due great credit for saving the barn with only a scant supply of water on the premises at the time.

Big Fox Film Termed Epic Opens Monday

"The World Moves On" Hailed as Love Story of a Century

Bitterness of hate, lust of power, fulfillment of conflict, glory of faith, ecstasy of love! These are the elements it is announced, that go to make up "The World Moves On" described Fox Film's "love story of a century," which comes Monday to the Alhambra theatre.

The film is the story of a family which, over four generations, spreads its branches over four nations of the earth. The picture comes adorned with the reputation of an epic film. It is said to be the most ambitious work to date of Winfield Sheehan the producer.

The film will reveal for the second time in America, Madeleine Carroll, glamorous star of "I Was A Spy" in which she is co-starring with Franchot Tone and the work of both won the praise of the New York critics and the plaudits of the crowds.

ADVERTISING CANADA

The Travel Bureau, established at the last session of the federal parliament, is doing some tentative advertising in American papers with the object of attracting sportsmen and tourists to Canada.

The advertisements are very attractive and at present are featuring the numerous hunting and fishing grounds from coast to coast in Canada. They should yield results.

As the nominations to be mailed to each shareholder prior to the shareholders' meeting. For the convenience of those who cannot attend meetings, provision is made for the registration of their votes in accordance with written instructions which they may give to the Minister of Finance.

One of the first steps to be taken in the organization of the Bank after the stock has been subscribed, will be the nomination and election by shareholders of the first Board of Directors.

Gordon Memorial to Celebrate Anniversary

Special Services Sunday and Supper on Monday

Keep in mind the Supper and Concert in Gordon Memorial School Room on Monday, Sept. 24th. Supper will commence at 5:30. Concert at 8 p.m.

A good musical program is being prepared for the concert. Also a juvenile play entitled "Ticky Deck" by kind permission of the Daily Mail, London, England.

This play is being put on by request with the following cast: Silas Tuttlewell (an old clockmaker), Jessie Stratton, Sylvia (his daughter), Flora Stratton, Gnomes: Flip-Kathleen Cooke, Flip-Betty Bolmer, Flop: Winnifred Phillips. Announcer: Betty Stratton. Curtain Manages: Elsie Cooke; Pianist, Doreen Cooke. Admission to Supper—Adults 35 cents. Children 20 cents. Admission to Concert—Adults 25 cents. Children 10 cents.

PEACE RIVER DISTRICT COVERS LARGE AREA

The Peace River country, the largest agricultural frontier of the Western Canadian plains exceeds the combined areas of Scotland, Ireland and England; is over six times the size of Belgium; is almost the size of Denmark; and it is the extent of France; and it is slightly larger than the republic of Uruguay. The Peace River country covers the combined areas of Pennsylvania, West Virginia and Delaware, and is larger than the combined six New England States.

At a meeting of the Church of England Synod held in Montreal last week, it was decided that women may become members of the general synod.

Redcliff Reminiscences

Taken From the Review File of September 24th, 1915

There is a great scarcity of farm help in this district at the present time.

At a social evening held at the hall on Monday evening, Mr. and Mrs. W. H. Sherwin announced the engagement of their daughter, Marian, to Mr. Roy Chapman, of Minneapolis.

The first Redcliff boy to return from the trenches arrived here this week, in the person of Dick Daley.

Alberta leads in legislation. Brides leading in the temperance movement, a bill granting suffrage to women will be introduced at the next session of the Provincial legislature.

Duffield.—In Redcliff, on Thursday Sept. 23, 1915, to Mr. and Mrs. C. E. Duffield, a son.

The new Redcliff elevator has taken 7000 bushels of wheat this week. Most of it is grade 2 Northern. Track prices today are: Wheat No. 1—75c, No. 2—73 c, No. 3—68c, Oats 25c, Flax—\$1.29, Barley—37c.

British Boat Wins The First Two Cup Races

American Boat Wins Today's Race by Over 3 Minutes

T. O. M. Sopwith's, challenging British yacht, Endeavor, has won the first two races of America's cup series from Harold S. Vanderbilt's Rainbow, scoring the first British race victory in the yachting classic since the late Sir Thomas Lipton's Shamrock IV won the second race from Resolute in 1920. In all four races have been run but the first had not counted as the boats did not finish within the time limit.

Sopwith won both today and Tuesday races with fair margin and showed his boat can make good sailing in all kinds of weather.

In today's race the Rainbow won out by over three minutes. The Endeavor got away to a good start and had a comfortable lead for the first leg. In the home stretch Vanderbilt outsped Sopwith by taking a short tack for the finish.

The best four in seven decades the winner.

Coming to Organize Adult Singing Class

MR. BULLEN

Will be at the Cliff Hall at 8 o'clock on Tuesday evening, Sept. 25th to form an adult singing class.

Subjects taken will be Sight Reading, Voice Production and Theory.

All interested invited to attend. Fees, 25c per hour per pupil.

MAY STOP OVER ON ROUND TRIP TICKETS

Change in conditions under which the railway will sell local thirty-day round trip tickets will, in future allow stop over enroute, it was stated by Mr. Ballantyne, Canadian Pacific agent here today.

Previously, Mr. Ballantyne explained, a passenger buying a ticket with thirty-day limit, for example, to Winnipeg, was required to use ticket for continuous passage to and from Winnipeg only. After Oct. 1st a similar ticket, without further cost or arrangement, will permit the passenger to stop at any point, going or returning, between the starting point and destination, within limit.

WHEAT POOL WILL BROADCAST OCT. 8

Arrangements have been completed for a program of broadcasting by the Wheat Pools of Manitoba, Saskatchewan and Alberta, as well as the Canadian Wheat Pool over the western radio network.

The western network furnishes radio facilities at the following centres: Winnipeg, Regina, Saskatoon, Edmonton and Calgary.

The first broadcast will be given Wednesday, October 8th between 8:15 and 8:30 p.m. to maintain standard time.

Around The World Cruise

Cunard White Star Liner To Make Interesting Calls At Many Ports
Delightment everywhere throughout

They will indicate that the 193 Panamair Around the World Cruise of the Cunard White Star liner *Franconia* will be well booked up. The *Franconia* will follow the route around the Southern Hemisphere as she has done during the past two seasons. The liner will leave New York on Saturday, Jan. 12, and sail south for her first stop at Cape Town. There will be a drive to Spain and other points of interest for passengers. Leaving Jamaica on the 19th the *Franconia* arrives at Port of Spain, Trinidad, on the 21st. A daylight passage of the Panama Canal is made, with an auto drive to Colon, Ancon, Panama City and Old Panama.

Francia calls at San Pedro de Macoris, in the Dominican Republic, and then to San Francisco, California, to allow Westerners to disembark for the cruise and also to permit passengers to drive to Los Angeles, Hollywood, Beverly Hills, and other famous California resorts.

Crossing the Pacific the Franconia will call at the Hawaiian Islands, where two days will be spent from Feb. 2 to Feb. 4. The itinerary here calls for tours to Hilo and Honolulu, the Lave Tubes, the Kilauea Volcano, the Fern Forest, Diamond Head and Waikiki Beach. An unusual call will be made in the Society Islands at Papeete (Tahiti). Here preparations are

being made for entertainment and dancing by natives to amuse the passengers. Cook Islands will be visited two days later and there will be a motor drive in the Island of Rarotonga; with native dancing at Avarua. Recalling the late Louis Stevenson, a visit will be made to Vailima, his home in Apia in the

The Franconia then sails on to the Fiji Islands, with a motor drive into the interior where there will be "Meke" or tribal dances performed. The Franconia will also visit Australasia. Five days will be spent in New Zealand; commencing with a motor drive from Auckland, a two days inland tour to Rotorua and the

Million Miles Her Objective

Elderly Woman Traveller Expects To Make Real Record

An interesting old lady who can probably lay good claim to the title of world's champion traveller is Mrs. Ella G. Munson of East Rockaway, Long Island, who has sailed from Montreal to add the Saguenay district to her list of places visited. Mrs. Munson has travelled close to 100,000 miles and at 72, hopes to

In all her travels, which include 53 trips across the Atlantic and 10 across the Pacific, Mrs. Munson has never encountered a severe storm nor an accident. She has tried almost every known method of transportation, including camels, elephants and packshaws, but has never yet been in a plane. Only one thing could induce her to fly, she said, and that was an offer from Col. Charles A. Lindbergh.

Mrs. Munson's trips are seldom planned in advance. She stays at home until the urge to travel comes.

Mrs. Munson was somewhat at a loss to explain her wanderlust, as her seven brothers and sisters are all "stay-at-home bodies," but thought she might have inherited it from Captain John Munson, an ancestor who in 1642 led a pilgrimage of Puritans to Massachusetts.

He was a golfer who always

cut for the course, his clubs slung

over his shoulder.

"Late?" echoed the astonished golfer.

"Yes, late! You promised to sweep my chimneys at eight, and it's past nine o'clock now."

The Franconia then sails on to the Fiji Islands, with a motor drive into the interior where there will be "Meke" or tribal dances performed. The Franconia will also visit Australasia. Five days will be spent in New Zealand; commencing with a motor drive from Auckland, a two days inland tour to Rotorua and the

by natives. Another unusual part of the call for the Franconia will be the Lesser Sunda Islands with visit ashore at Kalabahal. A day two will be spent in Bali at Tel Padang with visits to temples a magnificent scenic points. There will be an exhibition here of native art and crafts and Balinese dancing. Two days will be spent in Java. There will be an auto drive around Semarang to Batavia and Buitenzorg visiting the famous Botanical Garden.

Port of all will be Port Victoria. The Seychelle Islands with a motor drive to the Islands of Mahe, where an exhibition of native arts and crafts has been arranged. Kerkira is next visited, with a call at Mombasa. A "Zanzibar" tribal dance will be performed at Kilindiini. Next comes Zanzibar and Madagascar, visiting Majunga, one of the most interesting ports in the Indian Ocean. Three days will be spent in the Union of South Africa with drives in and around Durban and an excursion to Pietermaritzburg. Port Elizabeth and Cape Town with optional tours inland as desired.

Millions Of Acres Of Finest Wheat Lands In West To Come Under Reclamation Plan

Reclamation of millions of acres of the finest wheat land in the world, desolated by successive years of drought, is the immediate project of four governments in Canada, the federal, Manitoba, Saskatchewan and Alberta.

Plans have been laid already to relieve distress in the dried-out areas of the prairies, feed the impoverished people, provide seed for next year's crop and look after millions of half-starved cattle and horses. But there is another object in mind—how to reclaim for the land its binding and freshness due to years of drought.

For months the Dominion department of agriculture has been experimenting with grasses sown over all parts of the world to determine the best to act as a binder to the wind-blown soil of the prairies. Agricultural experts believe many parts of the West never will regain their permanent place as wheat producers until the soil has been rebound and rejuvenated. Eventually it may lead to reforestation and irrigation on a wide scale.

Some idea of the vastness of the problem may be gathered from these figures. In Manitoba, 100,000 acres in 13 municipalities affected by the drought. Sixty per cent of the cultivated acreage of Saskatchewan has been dried out and 40 per cent will not produce a marketable crop this year. The dry area in Alberta is 2,000,000 acres, a drought which will not produce a marketable crop this year.

Agreements were signed between the Canadian railways, the federal government and the prairie governments providing reduced rates on livestock feed and on the dry sections and cattle and horses shipped to northern ranges. It will be impossible to transport half-starved stock from the dried-out areas and some not worth the cost of feeding. It may result in wholesale slaughter of cattle to be processed into dog food.

A trickle of emigration has started in the dry sections of the West, regarded as practical on any large scale. In Saskatchewan, for instance, 40,000 families, comprising 1,000,000 people, have farms in the drought sections. About 100 families have deserted their farms in the south and selected new land in the north, but this movement is limited to the available acreage of unbroken land of good quality. In addition, west farmers are the world's best optimists and, like everybody else, dislike leaving their settled homes.

It is impossible to say how much the Dominion will spend this year in drought relief. It has been placed between \$10,000,000 and \$100,000,000 in addition to direct relief for the people. It will be impossible to give an estimate until a decision is reached on the campaign to reclaim the land and this is not expected for some time.

The Dominion already has taken steps to thwart possible hoarding, due to the needs of the west and the small Canadian crop. It has passed regulations forbidding the export of hay without license. This will conserve the Canadian supply in view of crop failures in the United States and Washington's removal of the \$5 a ton tariff.

A Remarkable Test

Wireless Telephone Talk Heard Distinctly Over Extremely Long Distances

Wireless telephone link has been established between India and London and recently a telephone conversation between a collector of Karschi and a London Post Office official was heard distinctly when the first test was made of the proposed wireless telephone service between the two cities. This is remarkable because the voice traversed 2,600 miles of land line, via Lahore, Agra and Surat, before being sent out from the Kirske wireless station.

The Latest Umbrella

Umbrellas for shoppers have just appeared in London. The top of the handle contains a dainty pencil. The entire handle may be turned and lifted to expose a surface on which shopping and other notes may be made and easily deleted.

There's always the bright side. You can't poke the same finger into an electric fan twice.

Gold, mixed with molten glass, produces the finest of all tinted glasses—a rich, royal ruby.

W. N. O. 202

Room For Improvement

More Readable Type For Printing Bill Is Suggested

Church officials in convention at New Plymouth in New Zealand considered the manner in which the Bible is arranged and printed, and their decision was that changes should be made. There were suggestions of brighter covers, a better arrangement of the reading matter and perhaps the use of some illustrations.

That there be more readable type used in printing the Bible. The New Zealand folk were certain that the Bible was too hard for people to read because it was in nearly all cases printed in such small type. That protest should be sustained, says the Stratford Herald-Beehive. The idea of the small print may be to keep the book within a reasonable size, thus making it easy to carry. But what is the use in making it easy to carry and at the same time making it hard to read? The average Bible is not nearly as easy to read as newspapers, and the reason is that newspapers pay a great deal of attention to securing the most readable type faces. We hope the church officials of New Zealand do something about it.

By Ruth Rogers

Winning Newspaper Union. More than \$1,000,000,000 is destined to go into the pockets of United States farmers through the agriculture adjustment administration before the end of 1935. Cotton, tobacco, wheat and corn benefit payments will total \$779,000,000, estimates estimated. Of this sum \$282,858,192.21 had been paid out up to August 25.

Of the later payments, cotton farmers have received the lion's share, \$152,510,718. What farmers needed \$67,781,851; corn-growers, \$44,815,988, and tobacco growers, \$13,773,785.

In addition to the \$779,000,000—which is being paid out to farmers for controlling production—cattle raisers will net about \$120,000,000 and sheepmen approximately \$7,500,000 by selling drought-stricken animals to the government. This raises the total for farm adjustments close to \$1,000,000,000.

The figures do not include benefit payments under the sugar program which is still being worked.

Investors Seldom Get Rich

Thousands Of Gadgets Are Never Granted A Patent

A window pane, when on being broken by a burglar, creates an instant vacuum, drawing the hapless intruder into the room and holding him on the floor until captured, was one of the 20,000 inventions of last year that were not granted patents. "Perpetual motion machines are the most popular, and about a hundred 'free' discoveries of this kind are made every year," a well-known firm of patent agents informed a representative.

Who knows but that as new powerful engines built by freight cars, some day a powerful plane will pull half a dozen gliders at its heels—the freight train of the air.

How To Organize A Poultry Pool

Preparing Poultry For Shipment Important Part Of Business

Producers' poultry pools, where farmers assemble, box pack and ready their own poultry, are growing in popularity and utility in practically every province of the Dominion, and the reason why there is not a poultry pool in every district is because the farmers, however willing, have not had the time to find out exactly how to proceed about the business. Markets pay a premium for poultry of the highest quality, when properly graded, box packed, and government inspected.

In all this work, the Poultry Services of the Dominion Department of Agriculture play a leading part, assisting the farmers in every way in organizing and carrying out the working arrangement of pools. These services have just issued a pamphlet on why and how to organize a poultry pool, and the pamphlet is a pretty interesting read. It shows that the assembling and preparing of poultry for shipment is as much the business of producers as the actual growing of the birds, and the overhead expense of preparing for shipment is largely covered by whether or not every member of the pool does his share of the work. The pamphlet is taken to form a pool are fairly set forth.

Aid U.S. Farmers

Large Sums To Be Paid Out To Help Agriculturists In States

More than \$1,000,000,000 is destined to go into the pockets of United States farmers through the agriculture adjustment administration before the end of 1935. Cotton, tobacco, wheat and corn benefit payments will total \$779,000,000, estimates estimated. Of this sum \$282,858,192.21 had been paid out up to August 25.

Of the later payments, cotton farmers have received the lion's share, \$152,510,718. What farmers needed \$67,781,851; corn-growers, \$44,815,988, and tobacco growers, \$13,773,785.

In addition to the \$779,000,000—which is being paid out to farmers for controlling production—cattle raisers will net about \$120,000,000 and sheepmen approximately \$7,500,000 by selling drought-stricken animals to the government. This raises the total for farm adjustments close to \$1,000,000,000.

The figures do not include benefit payments under the sugar program which is still being worked.

English Bakers Would Want Canadian Flour

If They Could Get Better Price For Their Bread

A five-year plan is underway in Great Britain in an effort to add to the consumption of varieties of bread and in some way obtain price regulation, stated J. H. Merrett, of Cardiff, one of 12 members of the National Association of Master Bakers and Confectioners visiting Canada.

Both Mr. Merrett and William Collier of Leigh, past president of the association, said a bread price war had prevailed in Britain for the last two years. In the Manchester and Liverpool districts, they said, until four months ago bread sold as low as "a penny a pound delivered to the door."

If the bakers can obtain a better price for their bread, they added, they will demand the higher quality flour from Canada. They declared the percentage of Canadian wheat in their bread was not as high as it should be at present.

Grows Coffee Plants

While on a trip through Michigan a year ago, a London, Ont. resident tasted coffee and peaches grown there. On his return he brought seeds of both plants. Now he has three coffee plants and a peach vine. The peaches taste like Canadian-grown, but grow on a vine instead of a tree. There are no pits and are about the size of a grape.

Reindeer In North

Four Year Trek Expected To End This Fall

After a trek of four years across Alaska and the northern corner of the Yukon, nearly 3,000 reindeer, which were purchased by the Canadian government in 1929, are now at the west side of the delta of the Mackenzie river in the Northwest Territories, and wait the coming of winter when they will cross the mouth of the Mackenzie on the ice.

Under the direction of experienced reindeer herders the herd began the trek in January, 1934, the herd started on the 70-mile dash across the mouth of the Mackenzie from the west to the east side but once out on the frozen river it was discovered that, owing to the high winds and blizzards which had prevailed during the winter, large stretches of the ice had been blown clear of snow, and as the deer cannot travel on glare ice it was necessary to make frequent and long detours from the route originally selected in order to get footing for the animals. To this further intensification of the difficulties after they had been out for more than 48 hours on the ice a heavy blizzard arose and in the darkness of this the deer stampeded back along their trail to the grazing area near Shingle Point where they had camped.

Another attempt to cross the Mackenzie will be made in the autumn of this year when the delta freeze again and with the selection of another route across the ice, which past experience indicates is more satisfactory. Copies of standard contracts used for such purposes may also be obtained upon request from the mentioned above.

In the case of ewes purchased under contract it is the custom for the rancher to deal directly with the farmer. This makes it desirable that the farmer be located within driving distance or a maximum of approximately fifty miles from the rancher with whom he is dealing.

The location and address of sheep ranchers is given on the map and those interested in the feeding of lambs or in the purchase of ewes under contract or otherwise may correspond directly with ranchers or with the secretaries of the associations mentioned.

The preparation of this map is one of the results of an economic survey carried on in behalf of the sheep ranchers of Western Canada by the Economic Branch of the Department of Agriculture with the co-operation of the Dominion Experimental Farms and Livestock Research Station.

Aid For Sheep Breeders

Rambouillet Rams To Be Imported From Montana

In order to improve the type of stock by the introduction of new blood, southern Alberta sheep breeders will receive Dominion aid in the purchase of Rambouillet rams in Montana, where their local breed, according to N. T. Macleod, secretary of the Alberta Sheep Breeders' Association. The Southern Alberta and Saskatchewan Sheep Growers' Association will share in the purchase and while the federal assistance will not meet the requirements of the breeders, it will be substantial.

A. A. Macmillan, head of the sheep and swine division of the Ottawa government, has been in Montana and has spotted the rams from which it is expected W. S. Benson, field man for the Canadian Co-operative Wool Growers' Association, will make the final choice. The Dominion government will pay Mr. Benson's expenses and the freight from Montana to the various destinations in Alberta and Saskatchewan. The purchases are expected to cost two or three dollars.

A Timely Warning

If there are still people who will invest in unknown stocks, on the advice of someone they don't know on a telephone tip, their friends and neighbors would be well advised to take warning. With the popularity of gold mine stocks, the telephone racketeers are busy again. It is not the old direct long distance racket, but it is still a trap to sell shares to dupes ready to part with good money in blind haste on the advice of strangers over camouflaged telephone calls—Branston Sun.

Only One Worthing

Although he has been dead 84 years, Henri de Balzac has just been awarded a literary prize of \$525. The French Society of Men of Letters, in Paris, has decided that no living writer was worthy to receive this award this year. The money will be given to the Balzac House in Paris.

Tennyson took 17 years to write his famous poem, "In Memoriam."

Well Desired

An English woman has said that he is not sure what a beauty parlor is. A beauty parlor is a place where a woman is quite content to look her worst for several hours on any day in which she wants to look her best for a few minutes.

Interesting History Of Panama Dates Back To The Time Of The Earliest European Explorers

Sheep In Western Canada

A Map Showing the Location of All Large Sheep Ranches in Western Canada Has Been Prepared by the Department of the Interior at the Instance of the Economic Branch of the Dominion Department of Agriculture

The purpose of the map is to improve the contact between ranchers and those wishing to feed lambs or purchase sheep. It is pointed out that there is a considerable movement of such livestock from ranches to farms particularly during the fall months for feeding purposes. Lambs are often contracted to farmers and breeding ewes are sometimes sold to farmers on a poundage of lamb basis. Copies of standard contracts used for such purposes may also be obtained upon request from the mentioned above.

In the case of ewes purchased under contract it is the custom for the rancher to deal directly with the farmer. This makes it desirable that the farmer be located within driving distance or a maximum of approximately fifty miles from the rancher with whom he is dealing.

The Republic of Panama, divided by the narrow canal strip, is one of the least known of the nations of Central America. It is yet practically every school child knows of the Panama Canal, the greatest American-built, American-owned waterway connecting the Atlantic with the Pacific.

Panama's Republic is one of the infants of the New World, both in area and age, yet its history dates back to the time of the earliest European explorers of America.

Columbus cruised in Panamanian bays on his fourth voyage in search of a short cut from Europe to Cathay. Balboa crossed this lean neck and laid to rest the Pacific ocean. Later it enjoyed high rank among the leading Spanish colonies because rich men in the West coast of South America preferred to cross it rather than to "double" Cape Horn on a long way around.

Panama's great advancement; however, dates from 1803, when the country changed from a dependency of Colombia to independence.

In 1862 the United States by treaty offered to pay the government of Colombia \$200,000, beginning the same year the ratification of this agreement. It further provided that the territory of Panama be ceded to the United States, neutral and under the guarantee of both countries.

The Colombian senate voted against the ratification of the treaty, and as a result on November 4, 1863, Panama declared itself an independent nation. The United States recognized the new republic on November 13, 1863. The treaty with the new republic was concluded a week later.

Under the treaty the Republic of Panama granted to the United States the right to build a canal in width and extending five miles on either side of the centre of the canal, with the proviso that the cities of Panama and Colon should not be included within the grant. The compensation granted to Panama for the canal was the same as was provided in the former offer to Colombia. The area measured 32,335 square miles with a population of half a million.

Actual work on the canal was started in 1880, when the work was made until 1907, when the work was turned over to the engineer corps of the regular army under the command of General W. W. Goethals, under whose efficient administration the gigantic work was brought to a triumphant close in August, 1914.

Shaped like a crawling caterpillar, with its head touching Costa Rica on the north and its tail reaching to the foot of the mountains of Colombia, Panama, equal in area to the State of Maine, is known to few people beyond its borders because its fame is overshadowed by the importance to the world of the Panama Canal and the Panama Canal Zone.

Panama City, visited by nearly every passenger who debarks at Colon, from the frequent Mauretania cruises, the largest to call at Colon, is the Pacific side of the canal. They find Panama City a shopper's paradise. The bay is still a fisherman's paradise. "Panama," in the native Indian tongue, means "abundant water."

When Morgan, the pirate, sacked old Panama City in 1671 more than 175 tons of treasure were needed to carry away the gold, silver and other loot previously looted from the natives of the Spaniards. With the discovery of gold in California in 1848 and the oldest town on the mainland of America, tourists never fail to visit the old cathedral in the tower of which still stands although the greater part of the church's walls have fallen in ruin. A tree growing where the centre aisle used to be.

A PARABLE

There are few people who have not heard the story of the repentant and his basket of feathers, but it bears repeating often if it is woven with the permanence of truth. Then, too, there are always those who have forgotten and need to hear it again.

One day long ago there came a man of holy orders, a penitent named Simon, whose mind was troubled. He had been guilty of the sin of gossip, and from that sin a great evil had grown, and now, Simon, repentant, had come to confess and seek pardon. The holy man, who was also a wise man, heard his tale and then, giving him a basket filled with feathers, bade him go through the town and drop a feather into each yard corner. When he had finished he was to return to the holy man with the empty basket.

Through the town Simon went and when he had finished he returned. "I have done what you told me to do, and now am I to be forgiven and my sin blotted out?" he asked.

"God in his mercy may forgive you, Simon, but your sin cannot be blotted out until you have gathered together again all the feathers you took away and distributed," the priest answered.

"But Father, I can never do that for the wind has scattered my feathers to the four corners of the earth."

"Then, Simon, so with your gossip. You can never gather up the mischief it has done, and so, though you may be forgiven your sin cannot be blotted out. It is an old story but there are always the seed scatterers who need to hear it, for through country and town they go with their baskets filled with little winged seeds, gathering and sowing. Few seed stay where they are dropped, for the wind scatters them broadcast, and from them grow many noxious plants; plants which are poisonous to man; dangerous to all life. Many of the seeds scattered are harmless folk who scatter and pass the time, forgetting that gossip is a sin, not a pastime.

Then, beyond condemnation, or those who scatter seeds with a purpose. They realize the potency of the seed and the capability of mankind in general, and so they fill their baskets with seeds from the most poisonous plants the earth can produce, and scatter them to the four winds of heaven with a purpose and an atmosphere of righteousness. Their seeds have the vigor of poison weed and they grow fast and there are times when they threaten to choke out the food and flower plants of civilization.

No farmer could afford to tolerate, for a moment, the individual who would sow his field with seeds of stink weed, thistle and mustard and even less could civilization afford to tolerate the man or woman who broadcast poison seeds of gossip for a purpose.

Britain's Motor Car Tax

Average About \$150 And Is Highest In World

There is only one private or commercial motor vehicle in the United Kingdom to every 27 of the population, a long way below the Canadian percentage. The industry, however, is overcoming the handicap of United States mass production, with, developing during and after the war, gave that country the jump in the home and foreign markets, including Canada. Ten years ago, Great Britain produced 71,396 motor vehicles. Last year the number was 250,778.

More than one million people are employed in the manufacture, maintenance and operation of British cars, and more than one-fifth of the national taxation is derived from motor licenses and gasoline, the figure being about \$27,000,000. Taxes on cars are placed upon the basis of about \$12.50 per horse power, and as the average British car is 12½ horsepower, the average car tax is \$150. You know what the car tax is in Canada. To offset the tax, British engineers have developed motors that consume very little gasoline, and most cars run from 40 to 50 miles per gallon. The British car is in fact the highest in the world, and so long as it remains anywhere near its present figure, will hamper the industry.

Britain, is fully alive, however, to the importance of the automobile trade, and in spite of the heavy sums spent on roads in the Dominion, it almost staggers the imagination to know that last year the nation spent \$400,000,000 on roads and bridges. And Great Britain is less than one-quarter the area of Ontario.—St. Thomas Times-Journal.

Seven-Foot Wheat

Grown In England From Old Seed Brought From India

Officials of the Indian government dug into a 5,000-year-old Mogul tomb and found a handful of wheat. They planted one ounce of it in England. And behold every seed germinated and sent up a lusty shoot to an average of seven feet.

It is a great discovery. It is stimulating to the imagination to learn that the farmers of India, 5,000 years ago, could produce wheat in every way superior to the scientific product of 1934. The new wheat will doubtless add much to modern agricultural knowledge and eventually increase the wheat yield.

If they could only dig into another 5,000-year-old tomb and learn how to tell it, everything would be lovely.—Vancouver Sun.

A Rare Reptile

Lived Many, Many Years Ago, And Had A Very Long Neck

From the dinosaur "valley of death" in Wyoming has been taken the skull of a rare reptile that lived through the swamps 140,000,000 years ago.

Announcement of the find came from T. Zbuzek Davidson, president of the American museum of natural history.

The skull is that of barosaurus, a huge and little-known dinosaur of which there is no complete fossil in existence.

Barosaurus was a semi-aquatic reptile, museum officials said. Its chief peculiarity was the extreme elongation of the neck vertebrae.

They look like sections of a stove pipe.

The Retortious

A lady much above the usual size was trying to enter a small car. A passenger who was waiting to get off, began to laugh at her futile efforts.

"If you were half a man, you'd help me on this street car," snapped the fat lady.

The passenger retorted, "Madam, if you were half a lady, you wouldn't need any help."

It Wouldn't Work

A Toronto minister suggests that editors and preachers should exchange jobs now and again. "What and have people fall asleep over their newspapers and listen to typographical errors from the pulpit?" says the Border Cities Star.

Schoolmaster—"This makes the fifth time I have punished you this week. What have you to say?"

Booby—"I am glad it's Friday, sir."

Archaeologists have found a stone hiked to Moses' tomb in a ruined church at Mount Sinai.

FAMOUS BELFAY AT YPRES RISES FROM WAR RUINS

The belfry of the Cloth Hall at Ypres, Belgium, familiar spot to thousands of Canadians when it was then a mass of ruins, has been reconstructed to the great joy of the inhabitants of Ypres. These pictures were taken when the King of the Belgians went to Ypres for the opening ceremonies. The main picture shows a general scene in front of the Cloth Hall with the new belfry on the left. At the right, inset, the King of the Belgians arrives with the Prime Minister for the ceremonies.

Might Make A Difference

If Children Knew How Neglect Hurts

It happened the other day in the old home town. A man standing on the corner across from the post-office noticed an old resident going in and coming out without any mail. He said something about him and it was this:

"There goes old Archie. You know he used to farm about six miles out until his wife died and the children all moved away. Then he took up a little place just on the edge of the town with about an acre of ground, and he lives alone there. There were four boys and three girls in the family, and he did the best he could by them in the way of schooling and he did all their dirty work. The girls are all married and have good homes, too—but they are all some distance away from here. Archie comes down to the post office every day after the train has come in and he's been doing it every day for a long time. He told me once he was always expecting there would be a letter from some of the children, and he has remarked several times that he guesses they're so busy they haven't time to write. I don't think there's a week goes by that he doesn't get the town paper and mark it here and there with the names of people he discusses with me now, and he stands over there at the counter in the post office and carefully wraps them up to send away. But he comes and goes day after day always hoping for a letter. Very seldom one comes but when it does Archie goes back to his little home where he would be alone. His children probably have families of their own and their own circle of friends and perhaps they would believe it themselves if they said they had no time to write home. If they had been old Archie coming to the post office and turning away empty-handed and if they knew that he did this day after day."

In good weather and rough times, well, they might see things differently.—Stratford Beacon-Herald.

Wary Of Life

Issue Of Legal Right To End Suffering Is Again Revived

Physicians, stirred by the plea of an 83-year-old man, are planning to push their demand for the legal right to end hopeless suffering by an over-dose of sleeping powder.

The long discussed moral question: Has a physician the right to kill? was revived by the plea of the former magistrate of Grant, in Franz Joseph Land.

Fifty years ago his vigor was equal to the exploration of the Arctic, and it was he who named Cape Grant in Franz Joseph Land. Last January he was told by his doctor that his condition was hopeless and that he would soon die.

He at once invited 500 friends to a party which he called his "swan song." Then he took a long cruise 500 miles up the Amazon and returned to his home in London to die.

In a letter published recently he deplored the fact that physicians had not hasten his end.

"I am more than 83 years old," he wrote, "I am not fit to go to any more of a nuisance to many. I would take with joy a double dose of sleeping powder—I who suffer without relief and whose eyes can read no more!"

"And yet, that is an initiative that I could not take by myself for I am unjudiciously opposed to suicide," he concluded.

Had A Good Grievance

Electricians Found Too Late That Rush Order Was Unnecessary

Down at the Hotel Pennsylvania one afternoon not long ago, the amplifying system in the main banquet hall was found to be badly out of order, and since a convention was scheduled for the next day, the chief electrician and his helpers worked all night putting things to rights. It was only a few hours before the convention was to start that they went home weary to bed, leaving the miles in shape. They didn't get tired till they woke up, and learned what the convention was.—The National Association of the Deaf.—The New Yorker.

A Stouping Diplomat

That a certain young man is wise beyond his years was proved when he paused before answering a widow who had asked him to guess her age.

"You must have some idea," she said.

"I have several ideas," said the young man with a sneer. "What if I trouble it that I hesitate whether to make you 10 years younger on account of your looks or 10 years older on account of your intelligence."

Battlehips Of Glass

Contending that battlehips could be made invisible from sea and air if made of glass, an ambitious inventor is trying to induce officials of the United States navy to invest all available glassware, including beer bottles, for an immediate start on the construction of such ships.

About 25,000 telephones are connected or disconnected in the U.S. on the average, each working day.

No one could make a fool of you if you weren't suitable material for the job.

Becoming Important Port

Vancouver Has Big Future, Opinion Of Major Swan

Future development of Greater Vancouver's harbor facilities was foreshadowed by Major W. G. Swan of the Engineering Institute of Canada.

Dealing with Vancouver's inner and outer harbor and with the mouth of the Fraser river, Mr. Swan described plans of railway, highway, bridge and dam development that would place this seaport to the fore among world ports.

"Joint interests in connection with the port business of Vancouver, New Westminster and North Fraser will be believed, because so intermingled as to make advisable the setting up of one port authority in the entire area."

"As part of a town plan for a seaport," Major Swan declared, "there is a natural demand that future development of the waterfront facilities should recognize proper access for the free movement of freight and passengers to and from the harbor by highway and railway with a minimum impediment to such movement."

"The plan should further recognize the need for adequate railway facilities. There should be, if possible, a direct control for the operation of a waterfront or terminal railway."

"The plan should provide for the systematic development of the waterfront with proper lines of demarcation between deep sea, coastwise, industrial and recreational waterfront facilities."

"Waterfront roads should be provided which allow direct connection between various portions of the harbor front and which enable city, police, ambulance, and other services to operate with the greatest dispatch."

"Are you going to study singing, as you intended?"

"No, I gave up the idea when the teacher convinced me it would take three years of hard work to enable me to sing as well as I thought I could."

One gram of radium contains enough power to lift a 28,000-ton vessel 100 feet in the air.

Tragic Love Affair

Interesting Page Taken From The Party History

There are in the history of the discovery of Canada, certain figures which we must save from oblivion. Less distinct perhaps than that of the great explorer from St. Malo, Jacques Cartier, they stand out in the dim light of the past, but no less significant.

On pages yellowed by centuries, in the strange letters of a past age, with great flourishes to the capital, the only existing account is preserved. In words simple and frank, André Thivet, "geographer to the king" in his "Commeographie Universelle" related the tale in the second volume, published by Pierre l'Estoile, in 1570.

On the 16th of April, 1542, Jean Francois de la Roche Sieur de Roberval, set sail with three vessels and 500 persons from the port of La Rochelle. It was a goodly company, some women, among them the damoiselle Marguerite de Roberval, gentle maid of the court, artisans of all kinds, men freed from the prisons and even galley slaves, expert in the new world's a labyrinthine harbor known in the old.

It is not long until a love idyll begins. The young Gascon de Hurville, a courtier, 27 years old, and the damoiselle de Roberval. Then someone tells the captain, Marguerite is in love. They are opposite Demos, the terror of lost fishermen. A small boat puts out from the galley to warn the courtier's ship. The servant are put ashore on the deserted island.

Anyhow, the young Gascon de Hurville, a courtier, 27 years old, and the damoiselle de Roberval. Then someone tells the captain, Marguerite is in love. They are opposite Demos, the terror of lost fishermen. A small boat puts out from the galley to warn the courtier's ship. The servant are put ashore on the deserted island.

Need Gradual Approach

People Cannot Grasp Great Innovations Without Preparation

There is a quaint ingenueness about the 18-year-old Indian, British Columbia, who gathered in 30 or 40 horses and then tried to sell them to their proper owner, with the result that he was committed to a term in jail. He had spent all his life in the wild and had never seen even a locomotive. Cities were unknown to him and all the modern inventions were just so many miracles. His eyes were in danger of popping out of his head as each new marvel was revealed to him.

The steamer on which he was carried to Vancouver astonished him, and when he came to the city, with its huge buildings and its hurrying crowds, he was amazed and speechless. Taken to the parks he saw children playing in the pools and exclaimed "Papposes like ducks!" He could not understand the trolley cars and wanted to know how they moved. An attempt was made to explain, but it was lost upon him. All he could perceive was "little wheel make big wheel go round," and probably this was as satisfactory to him and as instructive as a more complete explanation. He was a simple creature, but as electricity would be to the average man.

The condition of this man, regarded as sufficiently intelligent in his own environment, may be compared with the mind of a century ago. In the person of Marguerite and her old intelligence, if he could have been plunged all at once into the science and invention of the present day, he would have been as dumb as a fish.

On our way, if the man of to-day, knowing what he knows, could suddenly be placed in a world that will be a century hence, he would be as dumb as a fish. Such sudden transports are more than the ordinary mind can grapple with. We need a gradual approach. The same thing is true of any sudden transition from one state of mind to another. A great deal of explanation may be necessary, so-called, and others of many.

Immature minds refuse to alter their grip of the old and cling to what they remain in the status quo. They cling to the delusion that because the world is changing, they must therefore have no change should be thrust upon them, and their persistent refusal to face new facts and conditions creates a real problem for their relatives. They have not even the adaptability of this old Indian, who will probably accept his commitment to jail as a novel and interesting adventure.

Criminal Law

British Columbia Official Proposes That U.S. Adopt Canadian Police System

Thomas W. S. Parsons, assistant commissioner of the British Columbia police, is at a meeting meeting preceding the opening of the American Bar Association's annual convention, at Milwaukee, proposing that the United States adopt the Canadian system of provincial police in each state, with some form of national police to assist in tracking down criminals.

He advocated a single national force that has never yet to know them. One who understands bees can work as safely in another apical as in his own.

Regardless of the jungle temperament, the bees will sting only when he believes there is no other way out. See specialists say.

Worker bees, which do the stinging, do so only in defence of their hive. Away from their lives bees are just upon their work, and the stinging is induced to sting.

Worker bees, which do the stinging, do so only in defence of their hive. Away from their lives bees are just upon their work, and the stinging is induced to sting.

Good Word For The Farm

Alberta Entries 300 Ahead Of Previous Fiscal Year

Interesting Word And Usually Ensures Competency For Old Age

It has become the fashion lately to deride farming. Now farming is not all ease and profit. No farming involves a deal of hard work. But when you think of the money that is made in the farming business, it is no more interesting pursuit than agriculture.

No job more than farming will demand more of a competency after three score years and ten. Under the shining sun there is no more honest thing than the land.

Close to one-third of the earnings during the year were Canadian-born, as shown by a table of figures. Out of the total of 1,000,000 acres, 500,000 acres were Canadian-born, and 500,000 acres were foreign-born.

Teacher—"Willie, why do you write 'Bank' with a large B?"

Willie—"Because I wrote said a bank was no good unless it had a large capital."

About 100 persons die every year in the United States from rabies.

The average lay man is too lazy to worry about his laziness.

WORLD HAPPENINGS
BRIEFLY TOLD

President Roosevelt has received a report saying employment in United States has increased 4,130,000 since he took office.

Dr. J. A. MacArthur, 68, pioneer leader of the medical profession in Manitoba for more than half a century, died recently in Winnipeg.

Extension of the recommendation system to supplant examinations in the schools was urged by Duncan MacArthur, deputy minister of education for Ontario.

Veteran of both the Boer war and the Great War and former Arctic trader, Major M. Moulague-Maxwell, 62, is dead at Vancouver from a heart infection.

The Australian cabinet considered British protests against the new import duties on Lancashire textiles and ruled the tariffs are to be maintained.

The Indian government's ban on flying over the northwest frontier will lengthen the London to Melbourne air race in October by 1,000 miles.

Henri Gagnon, Quebec, president of the Canadian Press, and managing director of the newspaper Le Soleil, has been elevated to the rank of an officer of the Legion of Honor of France.

Peria has informed the League of Nations it will stand as a candidate for China's seat in the assembly. China's mandate expires this year and Peria considers itself qualified to represent Asia.

Captains of Great Lakes steamers may low water levels in the lakes have uncovered rocks and sandbars, and cargoes have had to be considerably reduced from other boats.

Vessels have grounded this summer in places previously considered safe, they declared, and expect to stay to open the bridge continually.

Cheap Television Sets

New System Developed Promises a Set at Low Cost

A new system invented by Mr. R. W. Hughes, of Plymouth, England, may result soon in the production of cheap television sets for all.

Mr. Hughes said he had thought a television receiver, built with a light valve and amplifier, could be mass produced to sell at \$10 or less.

With his somewhat crudely-constructed apparatus, Mr. Hughes is able to project a 100-line picture on a screen two feet square.

A system of vibrating mirrors causes a small but instant spot of light to travel over the screen and form the images.

Mr. Hughes is also developing an apparatus which, he is stating, overcomes the problem of synchronizing—one of the chief difficulties of television—and also holds the picture steady for considerable periods.

Firms in this country as well as in Germany and the United States have been interested in the invention, and it is said that successful negotiations have been concluded with a British company.

Mr. Hughes has been working for nearly two years on his new apparatus and has built a special transmitter to test his receiving apparatus at any time.

Must Be Improved

Canada Must Raise Better Hogs To Capture Market

The Canadian farmer lost \$12,000,000 in 1933 by reason of the fact Danish hogs were better than Canadian hogs, J. S. McLean, president of Canada Packers, says in the annual report. Unless Canadian hogs are improved, he said, the same amount will be lost each year.

"The securing of this \$12,000,000 lies in the hands of the Canadian farmer," he continues, "and it is not the job of the government to do it, he will reap the entire benefit."

The "certain lack of confidence" existing between the farmer and the packer was due chiefly to the farmer.

Stay Was Uncertain

A social worker on her first visit to a prison was greatly impressed by the sorrowful attitude of one man she found.

"My poor man," she sympathized, "what is the length of time you'll spend here?"

"All depends on the ladies," replied the mournful one. "I'm the warden."

The first merry-go-round at Coney Island was introduced by the grandfather of George Raft.

Seven thousand stars can be seen by a person with average sight.

The White Sea Canal

Has Provided Leningrad With Cheaper Means of Transport

One of the most revolutionary accomplishments of the Soviet Union is the construction of the White Sea Canal connecting the Baltic and the White Sea. Heretofore Russia had two water routes leading to Europe—one by way of the Black Sea, the other by way of the Baltic—and both could be blockaded.

Now, however, Leningrad can no longer be shut off from the outside world by a blockade of the Baltic, for ships of commerce or war can make their way northward by the new canal to the White Sea and sail around Sweden and Norway. Not only will Leningrad become more important, but a district rich in phosphates, iron ore and lumber will be able to ship its products far more economically than ever before.

Nobleman Runs Coffee Stall

Duke of Manchester's Son Hopes To Start Chain

Lord Edward Montagu, second son of Duke of Manchester, the London Express said, is running an outdoor refreshment stall at Maldenhead, near Thames river side resort where there are many country clubs.

His "coffee stall" is mounted on the chassis of an automobile, from which he serves coffee, other soft drinks, sausage and sandwiches.

Most of his patronage is from taxi drivers and chauffeurs who bring customers to Maldenhead from London.

Lord Edward, who is 28 and a former racer in the Canadian west, told a reporter he started his business with £1 (about \$5) in cash and made \$4 within 24 hours. He hopes to start a chain of stalls, he asserted.

Using Their Brains

People in England Making Money By Unusual Means

Just round the corner, everywhere in Britain, there lies wealth waiting to be picked up in a thousand unexpected ways by men and women of business initiative.

There is a radium mine at St. Ives in Cornwall, for instance, which reveals the well-informed local inhabitants will tell you possesses enough of that rare substance to supply half the hospitals of the world.

Some people have fortunes by using that prosaic and very common substance chalk in unusual ways.

Modern science can turn it into a valuable asset.

Plans are already afoot, indeed, to equip a factory for such a modern miracle.

A man saw a fortune in sweat and blood.

He borrowed the money, bought an old lorry, and went along his local London avenue, where they always find it.

He was there for a while, but he is not resting on his laurels, for he has secured money in short hair.

He buys it, and he is not resting on his laurels, for he has secured money in short hair.

He buys it, and he is not resting on his laurels, for he has secured money in short hair.

He buys it, and he is not resting on his laurels, for he has secured money in short hair.

He buys it, and he is not resting on his laurels, for he has secured money in short hair.

He buys it, and he is not resting on his laurels, for he has secured money in short hair.

Little Journeys In Science

INSECTS

(By Gordon H. Guest, M.A.)

Insects are our greatest friends—and our greatest enemies. Some aid man and some harm him. One is the history of the earth it appears as if they might inherit the earth and get the control of it.

Counted 340,000 different kinds of insects that are living to-day. Of this vast number man has domesticated and used products of the labor of only one—the honeybee.

It is of interest to know that an insect that can crawl through the eye of a needle has a little heart and other organs. Insects reverse man's method and wear their skeletons outside.

They are without lungs but air gets to every part of their bodies through a large number of microscopic tubes. This system of obtaining air works so efficiently that it is doubted whether an insect's blood is not more efficient.

In regard to intelligence, many an insect has more brain-power, in proportion to its weight, than man has. A spider is a very expert bridge-builder. In Texas are found ants which clear the ground from wood and are so efficient that they can produce such needs as it wishes to eat. Bees have, in proportion to their size, more intelligence than man. House-flies are not noted for their brain power, but they are expert in their own way.

Among the most useful insects in the world, which lay 330 times as many eggs as a bee, are the bumblebees, 240; wasps, 100; dragonflies, 28; and butterflies, 8.

Illustrated Lecture Here on October 4th

Has Been Arranged by Mr. Hector Lang M. L. A.

Mr. Hector Lang, M. L. A. for this constituency, has made arrangements with Mr. Donald Cameron, B. A. to give one of his lectures in Cliff Hall here on Thursday evening Oct. 4th.

Mr. Cameron, who is connected with Extension department of the University of Alberta, has chosen as his subject: "The folk High School in Scandinavia," which deals with education for adults in which regular and systematic study of some non-vocational subjects under the guidance of a lecturer or director are taken up. The address will be illustrated with lantern slides, and it will be free to all interested.

This lecture, we are sure, will prove highly interesting educational and instructive, and should be well attended by both old and young.

Mr. Lang has been instrumental in bringing several such speakers here in the past and all have been thoroughly enjoyed.

Will is Wild Boy in Latest Film Comedy

Fogey's "Handy Andy" Furnish
Of His Career

His wife wants him to retire and play a little, but all play and no work makes Will a wild boy.

That, in brief, is the story of Will Rogers' latest picture, "Handy Andy" Thurs. Fri. and Sat. at the Monarch Theatre. Advance reports from the previews say this is the funniest comedy of his career. And the highlight of the story bear this out.

Will is getting along comfortably in his new store when his wife, Peggy Wood, persuades him to sell out. First he takes up pigan raising, but he has to stop that when his pets fly all over the house. Next he takes up golf with uproarious results. Then his wife and daughter, Mary Carlie, persuade him to attend the Mardi Gras in New Orleans.

That's when things really begin to happen.

Of course there's more to the story than that. Much more. Among other things. Will serves as cupid in his daughter's romance with a young man his wife doesn't approve of. And there is a surprise ending that can't be tipped off in advance.
